Last revised February 2009
Congratulations on your acceptance into the ILT master’s program—and welcome into the ILT master’s program, K12 teaching track!

This handbook is designed to help you navigate your way through the program. The first several items help you get started successfully. Additional items support your completing program requirements and final-term activities. The appendix contains rubrics for assessments that are integrated into various courses and learning experiences.

Getting Started
- ILT-L - the Program Listserv
- ILT Competencies
- ILT Values
- Technology Requirements

Completing the Program
- Required and Elective Courses
- Course Schedule
- Working with your Advisor

Graduating
- Graduation Paperwork
- Submitting your Portfolio

ILT Competencies and Assessments
Getting Started

New students should start here as they get oriented toward program requirements and resources.

ILT-L - the Program Listserv

Every ILT student is asked to subscribe to the program listserv, called ILT-L. Changes in course offerings and program requirements are announced there, as well as notices about jobs, professional meetings, service opportunities, and professional resources. You may also post announcements and respond to issues from that same email account. To subscribe, follow the instructions below.

How to Subscribe to ILT-L

To subscribe, get into the email send e-mail to:

listproc@lists.cudenver.edu

Leave the subject header blank.

In the body of the message, type:

subscribe ILT-L Firstname Lastname

Upon subscribing, you will receive a welcome post, containing important info about the listserv. Please save that post for future reference.

How to Unsubscribe

To unsubscribe from ILT-L, send a message to:

listproc@lists.cudenver.edu

Leave the subject header blank.

In the body of the post, type:

unsubscribe ILT-L

This information will be repeated in the welcome post you received upon subscribing.
ILT Competencies

Graduate degrees are based on professional standards established in the field. Our program is based on standards established by AECT (Association for Educational Communications and Technology) and ISTE (International Society for Technology and Education). We have developed a set of 10 competencies designed to meet these professional standards. The competencies include skills in systems analysis, instructional design, problem-based inquiry, leadership, change, and management. The full list is presented below.

As you progress through the program, you will demonstrate these competencies by completing specific projects in different courses.

<table>
<thead>
<tr>
<th>Competency</th>
<th>Residential Courses</th>
<th>Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Adopt a reflective-practice stance to your work</td>
<td>IT 6750 Trends &amp; Issues</td>
<td>Reflective Practice</td>

<td>Management Report</td>
</tr>
<tr>
<td>10. Participate in a change process and provide leadership in helping people adopt new technologies or practices</td>
<td>IT 6930 Internship</td>
<td>Leadership Report</td>
</tr>
</tbody>
</table>

You will demonstrate proficiency in each of the ILT Competencies via program assessments integrated into required coursework. These assessments will be managed within LiveText, an assessment and portfolio system used by the School of Education and Human Development. Passing off required assessments in
individual classes will make the portfolio review easier, allowing you more flexibility to showcase your competencies and projects in a way that best suits your intended audience (e.g., prospective employers).

More information about ILT assessments (also called performance-based assessments or PBAs) is available within LiveText and the ILT 1000 Important Info section of eCollege.

**ILT Values**

Accompanying the ILT Competencies are a set of values that form the basis for our teaching, learning, and professional practice.

*Diverse settings and environments.* ILT students prepare to work in diverse settings and apply their knowledge to those settings, including corporate, higher-education, and K12 settings. Within those settings, ILT skills relate directly to classroom, work/field, online, and informal learning environments.

*Moral and responsible conduct.* ILT students are trained to acknowledge and honor the moral dimensions of their work. As instructional technologists, ILT graduates should maintain the highest level of professional comportment, including dealing responsibly to issues and problems related to technology and education. ILT students and graduates should respect diverse perspectives and work to ensure full equity, fairness, and access to technology for their constituents.

*Collaboration and inclusive decision-making.* Professional practice requires constant collaboration, communication, and distributed participation. Much work is completed within problem-solving teams. Wherever possible decision-making processes should include all stakeholders and reflect democratic values that respect the varying perspectives of all participants.

*Design* of learning resources extends to instructional, informational, multimedia, and work-support products. All of these resources need to be integrated into a system of accountable learning and performance. Principles of cognition serve as a foundation for design, complemented by aesthetic, pragmatic, and moral concerns.

*Appropriate use* of technologies and resources is the second main concern of the ILT program. This includes the integration of learning technologies into teaching environments and practices; adoption of resources; and systemic change by individuals, groups, and organizations.

*Inquiry* is a key to professional improvement and effective practice—not just reserved for professors and doctoral students. ILT students conduct inquiry for understanding, and to improve professional practice and decision-making. In many ways, completion of the master’s degree itself is a major commitment to inquiry.

*Evaluation and assessment* are critical to practice in today’s world to assure a proper fit of learning technologies and interventions within existing systems of teaching, learning, and performance. Evaluation for improvement (formative) and accountability (summative) depends on assessment of student learning outcomes and attitudes. ILT students learn to create and use assessments for various evaluation purposes, and to evaluate programs, products, and practices.

*Pragmatic stance toward practice.* The ILT program relies on a diverse mix of theories and knowledge bases, from ISD to the learning sciences to critical theory to management models and principles. This diversity is intentional and grounded in a belief that the problems should dictate the model—not the other way around. Reflecting this pragmatism, ILT
courses usually adopt a constructivist, activity-centered approach, but also include direct-instructional strategies and field experiences to fully prepare instructional technology leaders.

_Open boundaries_. The field of instructional design and technology (IDT) has an established knowledge base, but we should always remain open to new ideas and connections with other disciplines. Hence ILT professionals should seek out interactions with other educators and workers, to learn from them and to contribute to collective understanding of challenging problems of practice.

You will demonstrate these values in your submitted work, including your professional portfolio. In particular, faculty will look for these values in reflections, philosophy statements, and professional reports. Failure to adhere to professional standards and values, including university ethics requirements, may be grounds for discipline and dismissal from the program.

In addition to the ILT competencies, you will complete a diversity competency required of all students in the School of Education and Human Development. At three points in your program (admissions, prior to internship, and prior to completion), you will be asked to reflect on your experience with diverse audiences and values. We hope to see progress over time as you reflect on your own experience, on those you work with, and on the larger systems of society and culture.

### Technology Requirements

Each ILT student is expected to have access to a Web-connected computer for completing of routine course requirements and communication with the program. Development courses (IT 5600 and IT 5610) will have software requirements, and you are strongly advised to purchase web-authoring software. Wait until you take the course, however, before purchasing, to make sure you are getting the correct version of required software.

You will need regular access to high-speed Internet connection, either at home or a convenient location at work. In most cases students will arrange for broadband connectivity from home.

The university conducts much of its official business using your email address. It is therefore essential that you provide them with your preferred email address. A free email address is available to all students using the Ouray server. For more information see: [http://www.cudenver.edu/Resources/ITS/techServices/accountPasswords.htm](http://www.cudenver.edu/Resources/ITS/techServices/accountPasswords.htm). This Ouray email becomes your default email address that the university uses to communicate with you. To change to another email address, see the instructions within the SMART registration system: [https://hydra.cusys.edu/pinnacle/cgi-bin/sisget.cgi/dn/awssgnsn/](https://hydra.cusys.edu/pinnacle/cgi-bin/sisget.cgi/dn/awssgnsn/)

If you own a laptop, you may want to get in the habit of bringing it to classes. You can connect to the Internet through a wireless network available in campus classrooms.

Nearly all ILT courses use eCollege shells. eCollege is a course management system, similar to WebCT or Blackboard. Within the course shell, you are able to submit assignments, share resources, download documents, and participate in discussions. To get access, you need to sign onto the CUOnline website: [http://www.cuonline.edu/](http://www.cuonline.edu/)

We encourage you to get to know the resources available at the ILT website, for example, the Campus Resources page at: [http://thunder1.cudenver.edu/ilt/resources/campus_resources.htm](http://thunder1.cudenver.edu/ilt/resources/campus_resources.htm)

Completing the Program

This section is meant to equip continuing students with information useful in completing the program.

Required and Elective Courses

The table below presents the required courses in the ILT program, divided into early, middle, and late courses. Also shown are some common electives.

<table>
<thead>
<tr>
<th>Initial Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>IT 6750 Current Trends &amp; Issues in IT</td>
</tr>
<tr>
<td>IT 5600 Multimedia Authoring: Web</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Subsequent Required Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>IT 5710 Telecommunications and Networking in Education</td>
</tr>
<tr>
<td>IT 6515 Curriculum Leadership for Technology Integration</td>
</tr>
<tr>
<td>IT 6740 Learning Processes in IT</td>
</tr>
<tr>
<td>IT 6720 Research in ILT</td>
</tr>
<tr>
<td>IT 5830 Workshop: Assessment and Technology</td>
</tr>
<tr>
<td>IT 6999 Leadership and Practice in IT</td>
</tr>
<tr>
<td>IT 6930 Internship/Field Experience</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Electives</th>
</tr>
</thead>
<tbody>
<tr>
<td>IT 5370 Digital Video for Interactivity</td>
</tr>
<tr>
<td>IT 5340 Digital Storytelling in the Curriculum</td>
</tr>
<tr>
<td>IT 5130 Instructional Message Design</td>
</tr>
</tbody>
</table>

Note: The plan of study fulfills requirements for CDE endorsement in Instructional Technology - Specialist Level. See the ILT website for more information about endorsement options.

Course Schedule

IT courses are offered by the ILT program on Saturdays, weekends, and online. You can take classes at your own pace, choosing courses as they fit your scheduling needs. We try to make courses available at convenient times. A schedule of planned courses for upcoming terms is available from your advisor.
Working with your Advisors

Your two advisors, Jannette Noonan and Brent Wilson, are critical links to the program. Get to know them both and feel comfortable consulting with them about your progress in the program. Email is a favored form of communication because it leaves a record of your conversation. Keep track of any correspondence, particularly approved changes to your plan of study.

Graduating

In this section we review the procedures for completing your studies and graduating successfully. Your last classes should include IT 6999 Leadership and Practice, and IT 6930 Internship. Consult with your advisor about the best time to take these courses, given your situation. Note that the internship class is only offered in the fall. You may sign up for internship credits fall, and take an “in-progress” grade (IP) as you complete the work in the spring or summer. Consult your advisor for more info about this.

Graduation Paperwork

In order to graduate, a set of forms needs to be completed and returned to your advisor. You can request these materials from Jannette or drop by 1380 Lawrence St, LW701 to pick up the graduation packet; or phone 303-315-6300 to request that they be sent to your home. These forms are due back to your advisor by the first week of your final term.

Other items to keep in mind:

- Be sure to pay all fees for library fines, traffic tickets, or other encumbered charges. The university is good at keeping track of these things!
- You can participate in cap-and-gown graduation ceremonies, conducted fall and spring semesters. You should receive information about this once you have submitted your graduation forms. You will need to order a rented cap and gown for this event.
- If you do not plan to participate in graduation ceremonies, notify the Records Office (303-556-2388) and submit a $5.00 check with directions for mailing the diploma to your home.

Submitting your Portfolio

A professional portfolio is required during the final term of your program. Deadlines are close to these dates: Fall November 1st; Spring April 10th; Summer July 1st. Check with your advisor about specific deadlines during your graduating term. Portfolios are published on the Web, but may include other non-Web media as needed.

The portfolio serves as the comprehensive exam for your master's degree. The portfolio presents an opportunity for you to showcase your accomplishments to professionals and prospective employers. Required elements include:

- A main page
- A résumé and contact information
- A statement of philosophy about learning, instruction, and technology
- Projects, project excerpts, and reports that demonstrate your mastery of professional competencies and values
- A presentation to a professional audience
- Summary/reflection accompanying each project
To pass the portfolio, you must meet the following criteria:

- You must have completed all required PBAs (see the LiveText site)
- All portfolio elements above must be present
- Website design must meet professional standards

Filing for Endorsement

ILT students can file for an expedited review by UCD, and receive an institutional letter of recommendation. The steps below are taken from the ILT website.

1. ILT alumni of UCD who are adding an endorsement in Instructional Technology Specialist (ITS) to an existing license or certificate need to complete the Colorado Department of Education Application for Added Endorsement Based on an Approved Program. Go to:
   http://www.cde.state.co.us/cdeprof/Licensure_FirstTimeApp.asp
2. Scroll to the middle of the page and select the option that reads: “Added Endorsement.” Click on the option of “Request Application (Approved Program).” The CDE materials include a checklist with detailed information about fees and requirements. Follow this checklist carefully in assembling your materials. Because of page-number differences between download and hardcopy versions, pay particular attention to the section areas specified in the checklist.
3. When you have completed the application, please make a copy of your application materials for your own records.
4. Submit application materials, official UC Denver transcript, and fees (see the checklist) to:

   UNIVERSITY COLORADO DENVER
   ATTN: Jannette Noonan, ITS Review
   School of Education & Human Development
   Student Services Center
   Campus Box 106, PO Box 173364
   Denver CO 80217-3364

   -OR

   Deliver the application packet to the Student Services Center, ATTN: Jannette Noonan (7th floor Lawrence Street Center)

Upon receipt of your application, UCD faculty and staff review your coursework to determine the fit to ITS requirements. Based upon the review, institutional recommendation may be provided to CDE. Or, if any requirements are not met, we provide a letter to you indicating the evidence you need to provide. Please allow 2 weeks for the UCD review process. We will submit your paperwork to the Colorado Department of Education, and they will send you the official endorsement in 8 - 10 weeks. You can also check the status of the application by going to the following link:

   https://forms.cde.state.co.us/pes/DOBSearch.jsp

A word of advice: Plan ahead. Applications must be processed in the order received. In particular, the CDE Educator Licensing unit is unable to check application status and is unable to expedite paperwork. Please keep your address up-to-date with CDE’s Licensing Unit by calling 303-866-6628, extension 0. If you have any questions please email Jannette.Nooan@cudenver.edu or call 303-315-6351.
Additional Policies

Non-discrimination
The University of Colorado Denver (UCD) is committed to providing reasonable accommodation and access to programs and services to persons with disabilities. Students should contact the Disability Services Office, Arts Building 177, 303-556-8387, TTY 303-556-8484. Any other person requiring accommodation in order to access programs and services of the University of Colorado at Denver, either on or off campus, should request accommodation from the individual or office responsible for providing the program or service. This request should be made in a timely fashion to allow the individual or office adequate opportunity to provide reasonable accommodation. For further information or for assistance, contact the Ombuds Office, CU-Denver Building, Suite 700; 303-556-4493, TTY 303-556-6204, Fax 303-556-5855; e-mail: ombuds@carbon.cudenver.edu.

Back-up Work
Make and keep back-up copies of ALL your work. When working with computers STUFF HAPPENS. Back up everything frequently. Expect disks (even the hard disks on file and Web servers) to go bad. Technology failure is not an excuse for late or incomplete work.
