PHARMACY DOCTORATE (PHRD)

PHRD 5001 - Introduction to Pharmacy (0.6 Credits)
Course introduces students to how the pharmaceutical, chemical and biological sciences relate to each other and the practice of Pharmacy. Experience gained from this course allows students to comprehend how fundamental sciences integrate to form a foundation for pharmacy practice. Restrictions: Department Consent Required
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 5010 - IPPE Community (2 Credits)
This is the first in a series of experiential-based courses, providing 80 hours of community pharmacy practice experience. Students will participate in all facets of community pharmacy practice, with a particular focus on the development of communication and professionalism skills.
Grading Basis: Letter Grade with IP
Typically Offered: Fall, Spring.

PHRD 5015 - Mechanisms of Disease (3 Credits)
Introduces students to concepts in cell biology and pathophysiology that form a foundation for understanding mechanisms by which drugs act or intervene with disease processes. Knowledge gained from course sets a foundation for understanding disease development and progression in subsequent courses. Restrictions: Department Consent required
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 5025 - Applied Biological Chemistry (3 Credits)
Course builds upon student knowledge of biochemistry to explore applications of biochemistry to diseases, drug actions, and drug development. Knowledge gained from this course is used as a foundation for understanding the rationale for the therapeutic uses of drugs.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 5045 - Pharmacy Law and Regulatory Standards (3 Credits)
Course introduces students to pharmacy laws and regulations. Students are able to carry out their intern duties in accordance with professional guidelines and regulatory standards. The course also explores how to apply ethical and professional principles in various healthcare settings. Restrictions: Department Consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 5055 - Pharmacy Practice Fundamentals & Drug Information (4 Credits)
Course provides students with tactics necessary to perform dispensing duties in most pharmacy settings. Fundamentals of the practice of drug information are introduced. Pharmacy practice and drug information fundamentals are presented with the context of the history of pharmacy and contemporary pharmacy practice. Restrictions: Department Consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 5065 - Patient-Centered Communication 1 (3 Credits)
During this two-course learning series, students develop skills to communicate effectively with patients, caregivers and healthcare providers to facilitate optimal patient outcomes. These courses cover all aspects of professional communication, including gathering, organizing, conveying and documenting patient-related information.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 5075 - Pharmacotherapy Self-Care 1 (3 Credits)
Course prepares students to be able to 1) collect appropriate patient data to make an assessment for self-care (e.g. nonprescription products), 2) conduct a patient-centered assessment, and 3) design, implement, evaluate and adjust a patient-centered self-care plan. Restriction: Department Consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 5085 - Modern Drug Design & Actions (2 Credits)
This course explores the modern drug discovery and development processes and utilizes clinical examples to teach students to rationalize and predict how the chemical structure of a drug dictates its medicinal properties and routes of metabolism. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5095 - Pharmacology & Toxicology (2 Credits)
Using the nervous systems as a model, the course introduces students to the mechanisms by which drugs produce therapeutic effects and side effects. The mechanisms of drug toxicity and how toxicity can be prevented and treated will be explored. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5105 - Modern Drug Design & Actions (2 Credits)
Students introduced to biophysical and chemical considerations in development of pharmaceutics and products and compounding various dosage forms, principles of parenteral drug preparation and administrations. Knowledge gained allows students to understand formulation development and optimize dosage forms for individual patients. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5115 - Med Spanish (INTERM) (2 Credits)
Grading Basis: Pass/Fail Only

PHRD 5125 - Pharmaceutics (4 Credits)
Students introduced to biophysical and chemical considerations in development of pharmaceutics and products and compounding various dosage forms, principles of parenteral drug preparation and administrations. Knowledge gained allows students to understand formulation development and optimize dosage forms for individual patients. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5135 - Pharmacology & Toxicology (2 Credits)
Using the nervous systems as a model, the course introduces students to the mechanisms by which drugs produce therapeutic effects and side effects. The mechanisms of drug toxicity and how toxicity can be prevented and treated will be explored. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5145 - Modern Drug Design & Actions (2 Credits)
This course explores the modern drug discovery and development processes and utilizes clinical examples to teach students to rationalize and predict how the chemical structure of a drug dictates its medicinal properties and routes of metabolism. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5155 - Med Spanish (INTERM) (2 Credits)
Grading Basis: Pass/Fail Only

PHRD 5165 - Modern Drug Design & Actions (2 Credits)
Students introduced to biophysical and chemical considerations in development of pharmaceutics and products and compounding various dosage forms, principles of parenteral drug preparation and administrations. Knowledge gained allows students to understand formulation development and optimize dosage forms for individual patients. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5175 - Pharmacology & Toxicology (2 Credits)
Using the nervous systems as a model, the course introduces students to the mechanisms by which drugs produce therapeutic effects and side effects. The mechanisms of drug toxicity and how toxicity can be prevented and treated will be explored. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5185 - Modern Drug Design & Actions (2 Credits)
Students introduced to biophysical and chemical considerations in development of pharmaceutics and products and compounding various dosage forms, principles of parenteral drug preparation and administrations. Knowledge gained allows students to understand formulation development and optimize dosage forms for individual patients. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5195 - Med Spanish (INTERM) (2 Credits)
Grading Basis: Pass/Fail Only

PHRD 5205 - Pharmaceutics (4 Credits)
Students introduced to biophysical and chemical considerations in development of pharmaceutics and products and compounding various dosage forms, principles of parenteral drug preparation and administrations. Knowledge gained allows students to understand formulation development and optimize dosage forms for individual patients. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5215 - Modern Drug Design & Actions (2 Credits)
This course explores the modern drug discovery and development processes and utilizes clinical examples to teach students to rationalize and predict how the chemical structure of a drug dictates its medicinal properties and routes of metabolism. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5225 - Med Spanish (INTERM) (2 Credits)
Grading Basis: Pass/Fail Only

PHRD 5235 - Pharmacology & Toxicology (2 Credits)
Using the nervous systems as a model, the course introduces students to the mechanisms by which drugs produce therapeutic effects and side effects. The mechanisms of drug toxicity and how toxicity can be prevented and treated will be explored. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5245 - Modern Drug Design & Actions (2 Credits)
Students introduced to biophysical and chemical considerations in development of pharmaceutics and products and compounding various dosage forms, principles of parenteral drug preparation and administrations. Knowledge gained allows students to understand formulation development and optimize dosage forms for individual patients. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5255 - Med Spanish (INTERM) (2 Credits)
Grading Basis: Pass/Fail Only

PHRD 5265 - Pharmacology & Toxicology (2 Credits)
Using the nervous systems as a model, the course introduces students to the mechanisms by which drugs produce therapeutic effects and side effects. The mechanisms of drug toxicity and how toxicity can be prevented and treated will be explored. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5275 - Modern Drug Design & Actions (2 Credits)
Students introduced to biophysical and chemical considerations in development of pharmaceutics and products and compounding various dosage forms, principles of parenteral drug preparation and administrations. Knowledge gained allows students to understand formulation development and optimize dosage forms for individual patients. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5285 - Med Spanish (INTERM) (2 Credits)
Grading Basis: Pass/Fail Only

PHRD 5295 - Pharmacology & Toxicology (2 Credits)
Using the nervous systems as a model, the course introduces students to the mechanisms by which drugs produce therapeutic effects and side effects. The mechanisms of drug toxicity and how toxicity can be prevented and treated will be explored. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5305 - Modern Drug Design & Actions (2 Credits)
Students introduced to biophysical and chemical considerations in development of pharmaceutics and products and compounding various dosage forms, principles of parenteral drug preparation and administrations. Knowledge gained allows students to understand formulation development and optimize dosage forms for individual patients. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5315 - Med Spanish (INTERM) (2 Credits)
Grading Basis: Pass/Fail Only

PHRD 5325 - Pharmacology & Toxicology (2 Credits)
Using the nervous systems as a model, the course introduces students to the mechanisms by which drugs produce therapeutic effects and side effects. The mechanisms of drug toxicity and how toxicity can be prevented and treated will be explored. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5335 - Modern Drug Design & Actions (2 Credits)
Students introduced to biophysical and chemical considerations in development of pharmaceutics and products and compounding various dosage forms, principles of parenteral drug preparation and administrations. Knowledge gained allows students to understand formulation development and optimize dosage forms for individual patients. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5345 - Med Spanish (INTERM) (2 Credits)
Grading Basis: Pass/Fail Only

PHRD 5355 - Pharmacology & Toxicology (2 Credits)
Using the nervous systems as a model, the course introduces students to the mechanisms by which drugs produce therapeutic effects and side effects. The mechanisms of drug toxicity and how toxicity can be prevented and treated will be explored. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5365 - Modern Drug Design & Actions (2 Credits)
Students introduced to biophysical and chemical considerations in development of pharmaceutics and products and compounding various dosage forms, principles of parenteral drug preparation and administrations. Knowledge gained allows students to understand formulation development and optimize dosage forms for individual patients. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5375 - Med Spanish (INTERM) (2 Credits)
Grading Basis: Pass/Fail Only

PHRD 5385 - Pharmacology & Toxicology (2 Credits)
Using the nervous systems as a model, the course introduces students to the mechanisms by which drugs produce therapeutic effects and side effects. The mechanisms of drug toxicity and how toxicity can be prevented and treated will be explored. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 5395 - Modern Drug Design & Actions (2 Credits)
Students introduced to biophysical and chemical considerations in development of pharmaceutics and products and compounding various dosage forms, principles of parenteral drug preparation and administrations. Knowledge gained allows students to understand formulation development and optimize dosage forms for individual patients. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.
PHRD 5985 - Pharmacotherapy 1 (4 Credits)
This 7 course series includes pathophysiology, pharmacology, and therapeutics of a range of system based physiological conditions. Standards of care, controversial issues, pharmacotherapy advances, and patient management are covered. Areas covered in this course: gastrointestinal, pulmonology, dermatology, ophthalmology, otic diseases. Department Consent required.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 6015 - Pharmacokinetics (3 Credits)
The influence of physiological and pathophysiological factors on drug levels is considered. Knowledge gained allows students to calculate appropriate dosing of drugs in patients and anticipate how drug doses should be adjusted in disease and the presence of other drugs. Department Consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 6065 - Evidence-based Medicine & Literature Evaluation (3 Credits)
An introduction and step-wise approach to evidence-based medicine. Students understand commonly-used statistical tests and evaluate statistical results for statistical versus clinical significance. Students demonstrate by answering short drug information questions, presenting a journal club and writing a drug information paper. Department Consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 6085 - Pharmacotherapy 2 (5 Credits)
This 7 course series includes pathophysiology, pharmacology, and therapeutics of a range of system based physiological conditions. Standards of care, controversial issues, pharmacotherapy advances, and patient management are covered. Areas covered in this course: nephrology, cardiology 1. Department Consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 6095 - Pharmacotherapy 3 (5 Credits)
This 7 course series includes pathophysiology, pharmacology, and therapeutics of a range of system based physiological conditions. Standards of care, controversial issues, pharmacotherapy advances, and patient management are covered. Areas covered in this course: endocrinology, gynecology, urology. Department Consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 6915 - Seminar Research 1 (1 Credit)
Students will apply their ability to retrieve, evaluate, and utilize professional information in a critical and scientific manner. Students independently determine how to best solve a pharmacy-related question using scientific principles, and present their findings to a large audience.
Restrictions: Department Consent Required
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 6925 - Medicinal Chemistry (2 Credits)
This course is an application of medicinal chemistry concepts using clinically relevant case studies, designed to examine mechanism(s) of drug action and resistance, structure activity relationships, and other concepts related to the pharmacology and clinical use of modern drugs.
Restrictions: Department Consent Required
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 6945 - Pharmacotherapy 4 (5 Credits)
This 7 course series includes pathophysiology, pharmacology, and therapeutics of a range of system based physiological conditions. Standards of care, controversial issues, pharmacotherapy advances, and patient management are covered. Areas covered in this course: cardiology 2, infectious diseases 1. Restrictions: Department Consent Required
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 6955 - Pharmacotherapy 5 (4 Credits)
This 7 course series includes pathophysiology, pharmacology, and therapeutics of a range of system based physiological conditions. Standards of care, controversial issues, pharmacotherapy advances, and patient management are covered. Areas covered in this course: psychiatry, neurology. Restriction: Department Consent Required
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 6965 - Clinical Problem Solving Skills (2 Credits)
This course builds upon the principles and skills from PHRD 5055/6065 and includes application inside and outside the classroom of drug information, effective search strategies and literature evaluation, critical appraisal of scientific literature, and applying evidence in clinical practice.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 6975 - Pharmacotherapy 6 (2 Credits)
This 7 course series includes pathophysiology, pharmacology, and therapeutics of a range of system based physiological conditions. Standards of care, controversial issues, pharmacotherapy advances, and patient management are covered. Areas covered in this course: psychiatry, neurology. Restriction: Department Consent Required
Grading Basis: Letter Grade
Typically Offered: Spring.
PHRD 7025 - Pharmacogenomics (2 Credits)
Course provides students with an understanding of how genetic factors influence drug efficacy. Knowledge gained from this course enhances students' ability to select the most effective therapeutic intervention. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7045 - Public Health & Health Outcomes 2 (3 Credits)
Course concepts are medication safety, drug usage, pharmacoconomics, and pharmacoepidemiology. Students analyze medication systems by using population data and risk management strategies, critically evaluate economic literature on a drug, and compare pharmacy and non-pharmacy treatments on economic and humanistic outcomes. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 705 - Pharmacy Management (2 Credits)
The course provides an introduction to management in community pharmacy practice, hospital pharmacy management, and other business and management skills needed to be successful in a variety of different practice settings. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7085 - Pharmacotherapy 6 (4 Credits)
This 7 course series includes pathophysiology, pharmacology, and therapeutics of a range of system based physiological conditions. Standards of care, controversial issues, pharmacotherapy advances, and patient management are covered. Areas covered in this course: infectious diseases 2. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7095 - Pharmacotherapy 7 (4 Credits)
This 7 course series includes pathophysiology, pharmacology, and therapeutics of a range of system based physiological conditions. Standards of care, controversial issues, pharmacotherapy advances, and patient management are covered. Areas covered in this course: hematology, oncology, rheumatology, transplantation. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7805 - Honors Thesis Study Course (2 Credits)
Students in the Honors Program may use this elective course to complete specific outcomes of their Honors project over 1-2 semesters. The student/mentor must complete the Approval and Proposal forms (found on SOP website) prior to enrolling. Requirement: Department consent.
Grading Basis: Pass/Fail Only
Repeatable. Max Credits: 2.
Typically Offered: Fall, Spring.

PHRD 7808 - Introduction to the Pharmaceutical Industry (2 Credits)
Course provides a broad background on the pharmaceutical industry. Reviews of major pharmaceutical company functions will be covered. Emphasis will be placed on clinical development and areas of opportunity for those with a pharmacy or pharmaceutical sciences background.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7810 - Applied Pharmaceutical Outcomes Research Methods (2 Credits)
Students completing this course will be able to identify and write a clinical research question; identify variables for analyses; complete intermediate statistical analyses to answer their research question; write-up their study as a scientific manuscript; and present their research orally.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7812 - Seminar in Pharmaceutical Sciences (2 Credits)
Provides practical experience in the evaluation and discussion of research literature. Students will prepare a seminar and participate in scientific discussions. Students who are interested in broadening knowledge in pharmaceutical science, drug delivery, and improving their speaking skills will benefit.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7815 - Physical Assessment/Examination in Pharmacy (2 Credits)
This course is designed to provide students with functional knowledge and skills in the area of physical assessment and will aid students in enhancing the assessment of disease and drug therapy in a variety of practice settings.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7818 - Innovation and Entrepreneurship (2 Credits)
Students will have the opportunity to gain an understanding and recognize their creative abilities, promote innovation in themselves and others, and demonstrate productive thinking. Able to recognize a gap in healthcare, create a solution, and tell story of their solution.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7830 - Infectious Diseases Elective (2 Credits)
This course will address the pharmacology and appropriate clinical use of agents used in the treatment and management of selected infectious diseases. The course will also focus on pharmacodynamics of antimicrobial agents, antibiotic stewardship, antibiotic resistance, and statistics.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7835 - Introduction to the Pharmaceutical Industry (2 Credits)
Course provides a broad background on the pharmaceutical industry. Reviews of major pharmaceutical company functions will be covered. Emphasis will be placed on clinical development and areas of opportunity for those with a pharmacy or pharmaceutical sciences background.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7840 - Applied Pharmaceutical Outcomes Research Methods (2 Credits)
Students completing this course will be able to identify and write a clinical research question; identify variables for analyses; complete intermediate statistical analyses to answer their research question; write-up their study as a scientific manuscript; and present their research orally.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7850 - Seminar in Pharmaceutical Sciences (2 Credits)
Provides practical experience in the evaluation and discussion of research literature. Students will prepare a seminar and participate in scientific discussions. Students who are interested in broadening knowledge in pharmaceutical science, drug delivery, and improving their speaking skills will benefit.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7860 - Physical Assessment/Examination in Pharmacy (2 Credits)
This course is designed to provide students with functional knowledge and skills in the area of physical assessment and will aid students in enhancing the assessment of disease and drug therapy in a variety of practice settings.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7870 - Innovation and Entrepreneurship (2 Credits)
Students will have the opportunity to gain an understanding and recognize their creative abilities, promote innovation in themselves and others, and demonstrate productive thinking. Able to recognize a gap in healthcare, create a solution, and tell story of their solution.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7880 - Applied Pharmaceutical Outcomes Research Methods (2 Credits)
Students completing this course will be able to identify and write a clinical research question; identify variables for analyses; complete intermediate statistical analyses to answer their research question; write-up their study as a scientific manuscript; and present their research orally.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7890 - Seminar in Pharmaceutical Sciences (2 Credits)
Provides practical experience in the evaluation and discussion of research literature. Students will prepare a seminar and participate in scientific discussions. Students who are interested in broadening knowledge in pharmaceutical science, drug delivery, and improving their speaking skills will benefit.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7900 - Physical Assessment/Examination in Pharmacy (2 Credits)
This course is designed to provide students with functional knowledge and skills in the area of physical assessment and will aid students in enhancing the assessment of disease and drug therapy in a variety of practice settings.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7910 - Innovation and Entrepreneurship (2 Credits)
Students will have the opportunity to gain an understanding and recognize their creative abilities, promote innovation in themselves and others, and demonstrate productive thinking. Able to recognize a gap in healthcare, create a solution, and tell story of their solution.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7920 - Applied Pharmaceutical Outcomes Research Methods (2 Credits)
Students completing this course will be able to identify and write a clinical research question; identify variables for analyses; complete intermediate statistical analyses to answer their research question; write-up their study as a scientific manuscript; and present their research orally.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7930 - Seminar in Pharmaceutical Sciences (2 Credits)
Provides practical experience in the evaluation and discussion of research literature. Students will prepare a seminar and participate in scientific discussions. Students who are interested in broadening knowledge in pharmaceutical science, drug delivery, and improving their speaking skills will benefit.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7940 - Physical Assessment/Examination in Pharmacy (2 Credits)
This course is designed to provide students with functional knowledge and skills in the area of physical assessment and will aid students in enhancing the assessment of disease and drug therapy in a variety of practice settings.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7950 - Innovation and Entrepreneurship (2 Credits)
Students will have the opportunity to gain an understanding and recognize their creative abilities, promote innovation in themselves and others, and demonstrate productive thinking. Able to recognize a gap in healthcare, create a solution, and tell story of their solution.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7960 - Applied Pharmaceutical Outcomes Research Methods (2 Credits)
Students completing this course will be able to identify and write a clinical research question; identify variables for analyses; complete intermediate statistical analyses to answer their research question; write-up their study as a scientific manuscript; and present their research orally.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7970 - Seminar in Pharmaceutical Sciences (2 Credits)
Provides practical experience in the evaluation and discussion of research literature. Students will prepare a seminar and participate in scientific discussions. Students who are interested in broadening knowledge in pharmaceutical science, drug delivery, and improving their speaking skills will benefit.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7980 - Physical Assessment/Examination in Pharmacy (2 Credits)
This course is designed to provide students with functional knowledge and skills in the area of physical assessment and will aid students in enhancing the assessment of disease and drug therapy in a variety of practice settings.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7990 - Innovation and Entrepreneurship (2 Credits)
Students will have the opportunity to gain an understanding and recognize their creative abilities, promote innovation in themselves and others, and demonstrate productive thinking. Able to recognize a gap in healthcare, create a solution, and tell story of their solution.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 8000 - Applied Pharmaceutical Outcomes Research Methods (2 Credits)
Students completing this course will be able to identify and write a clinical research question; identify variables for analyses; complete intermediate statistical analyses to answer their research question; write-up their study as a scientific manuscript; and present their research orally.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 8010 - Seminar in Pharmaceutical Sciences (2 Credits)
Provides practical experience in the evaluation and discussion of research literature. Students will prepare a seminar and participate in scientific discussions. Students who are interested in broadening knowledge in pharmaceutical science, drug delivery, and improving their speaking skills will benefit.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 8020 - Physical Assessment/Examination in Pharmacy (2 Credits)
This course is designed to provide students with functional knowledge and skills in the area of physical assessment and will aid students in enhancing the assessment of disease and drug therapy in a variety of practice settings.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.
PHRD 7835 - Advanced Cardiovascular Pharmacotherapy (2 Credits)
The purpose of this course is to provide a more comprehensive and in-depth background in cardiovascular pharmacotherapy for students interested in, or planning to practice in, settings where the care of patients with cardiovascular disease is emphasized.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7836 - Ambulatory Care Elective (2 Credits)
Students will be introduced to emerging roles for pharmacists in the primary care setting, will gain further knowledge and skills regarding chronic disease management, and will be introduced to billing, regulatory, policy, and legal considerations for this practice environment.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7840 - Caring for the Psychiatric Patient (2 Credits)
This course builds on Pharmacotherapy 5 by addressing clinical, social, economic and ethical aspects of psychiatric care. Student teams examine psychiatric disease states from the patient's point of view, evaluate patient cases, write therapeutic plans, and role play patient education.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7842 - Medical Use of Cannabis (2 Credits)
Course will address the pharmacology and appropriate medical use of cannabis used in the treatment and management of selected disease states. Course will also focus on the pharmacokinetics, pharmacodynamics, legal aspects, special populations and patient information (safety) of cannabis.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7844 - Special Topics in Compounding (2 Credits)
Course will provide students with an understanding of principles and practices involved in clinical aspects of pharmacy compounding. Students will utilize readings, case studies, class discussion, outside-class assignments, and written evaluation to learn how pharmacy compounding may solve medication-related problems. Department Consent Required
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7850 - Geriatric Pharmacy Elective (2 Credits)
This course is intended to provide the student with an advanced understanding of pharmacotherapy in older adults as well as common medical, psychological, and social issues encountered when caring for older adults. Prerequisite: P3 status.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7854 - Database Mgmt Systems Independent Study (3 Credits)
Designed to give students a solid foundation in practical database design and implementation. This study will help students develop database design skills that have valuable and meaningful application in clinical informatics settings.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7855 - Independent Study (1-4 Credits)
Prerequisite: P3 status. Per Department Chair approval.
Grading Basis: Pass/Fail Only
Repeatable. Max Credits: 4.
Typically Offered: Fall, Spring.

PHRD 7856 - Independent Study (2 Credits)
Prerequisites: P3 status. Per Curriculum Committee approval.
Grading Basis: Pass/Fail Only
Typically Offered: Fall, Spring.

PHRD 7857 - Compounding Pharmacy Elective (2 Credits)
An elective course to offer compounding skills for pharmacy students.
Prereq: P1-P3 status.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7858 - Managed Care Elective (2 Credits)
The goal of the Managed Care Independent study at Kaiser Permanente Colorado is to provide the student with various managed care pharmacy experiences, both didactic and experiential. Prerequisite: P3 status
Grading Basis: Pass/Fail Only
Typically Offered: Fall, Spring.

PHRD 7860 - Special Topics in Integrated Health & Medicine (2 Credits)
This course is designed to develop a broad knowledge base in the field of Integrated Health and Medicine. This course will cover common vitamins and minerals, herbal products, and bio-identical hormones, and core domains and discussions of regulatory issues. Prerequisite: P1-P3 status.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7862 - Global Health Disparities (2 Credits)
Key issues in the struggle of decreasing global health inequality are medication access and affordability. This course provides expertise in these areas as well as prevention, screening, and treatment of communicable and non-communicable diseases affecting patients in resource poor areas.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHRD 7865 - Film and Healthcare (2 Credits)
This elective is designed to encourage pharmacy students to reflect upon the humanistic issues associated with health, disease and treatment through the lenses of film and literature.
Grading Basis: Letter Grade
Typically Offered: Spring, Summer.

PHRD 7870 - Pediatric Pharm Practice (2 Credits)
This course will be offered to students interested in developing and fostering their knowledge and assessment of childhood diseases and pharmacotherapy. Clinical pharmacy specialists and staff from the Children's Hospital of Denver will teach this course. Prerequisite: P3 status.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7880 - Women's Health Elective (2 Credits)
This course will address the clinical, social, economic, and ethical aspects of women's health care. Prerequisite: P3 status.
Grading Basis: Letter Grade
Typically Offered: Spring.
PHRD 7885 - Acute Care Pharmacotherapy (2 Credits)
Pharmacology and appropriate clinical use of agents used in the treatment of selected acute disorders found in hospitalized patients. The course will also focus on the comprehensive nature of these acute disorders. Recent advances in pharmacotherapy, patient-specific management strategies, and controversial issues will be included and emphasized. Prerequisite: P3 status.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7890 - Advanced Oncology Pharmacy (2 Credits)
Students will learn pathophysiology and treatment of solid organ and hematologic malignancies, practical use of antineoplastic agents, and provision of supportive care for patients of cancer. Prerequisite: PHRD 6750.
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7895 - Beginning Medical Spanish (2 Credits)
This Beginning Medical Spanish course, tailored for pharmacy students, is designed to allow students to become comfortable with conversational Spanish and medical vocabulary in various pharmaceutical contexts. Language learning is both academic and experiential. Prerequisite: P3 status.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7896 - Intermediate Med Spanish (2 Credits)
This intermediate medical Spanish course, tailored for pharmacy students, is designed to allow students to become comfortable with intermediate conversational Spanish and medical vocabulary in various pharmaceutical context. Language learning is both academic and experiential. Prerequisite: P3 status.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

PHRD 7905 - Advanced IPPE (6 Credits)
Students are placed in a 6-week, full-time (40 hours per week) patient care experience in which they can begin to apply their didactic knowledge. In this advanced IPPE students demonstrate competency to meet pre-APPE core performance domains and abilities. Requirements: Department consent required
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

PHRD 7965 - Health Care Informatics (2 Credits)
Course provides introductory content about informatics topics including a working understanding of knowledge systems for students to be able to manage medication use systems to optimize patient and population outcomes. Requirements: Department consent required
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 7995 - Clinical Capstone (6 Credits)
Course is designed to be a capstone that integrates essential core pharmacy practice topics. The philosophy of this course is to facilitate student learning, and holding students accountable for prior learning in an integrated manner using complex patient scenarios. Requirements: Department Consent required
Grading Basis: Letter Grade
Typically Offered: Spring.

PHRD 8045 - AdvPharPracExp - Medication Therapy Management (3 Credits)
Three-week rotation; 40 hrs weekly. This experience will take place in a community pharmacy practice setting. Students will participate in medication therapy reviews, pharmacotherapy consultations, anticoagulation management, and other clinical services that optimize therapeutic outcomes for individual patients. Requirement: Department consent required
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Typically Offered: Fall, Spring, Summer.

PHRD 8055 - AdvPharPracExp - Elective (6 Credits)
Six week rotation; 40 hrs weekly. This experience will take place in various practice settings. Students may participate in various activities that focus on medication-related problems dealing with various populations, with or without direct patient contact. Requirement: Department consent required
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

PHRD 8065 - AdvPharPracExp - Ambulatory Care (6 Credits)
Six week rotation; 40 hrs weekly. This experience will take place in an ambulatory care, multidisciplinary practice setting. Practice sites may include hospital-based clinics, physician group practices, and community or public health clinics that provide health care directly to patients.
Requirement: Department consent required.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

PHRD 8075 - AdvPharPracExp - Community (6 Credits)
Six week rotation; 40 hrs weekly. This experience will take place in a community pharmacy practice setting. Practice sites include independent, large chain or retail pharmacies that provide a variety of services, including administration of immunizations and health/wellness screenings. Requirement: Department Consent required
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

PHRD 8085 - AdvPharPracExp - Hospital/Health-System Pharmacy (6 Credits)
Six week rotation; 40 hrs weekly. This experience will take place in an inpatient practice setting. Students will be exposed to adult patients with a variety of disease states, and participate in other institutional activities related to clinical pharmacy services. Requirement: Department consent required
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

PHRD 8095 - Intersession (2 Credits)
Students present clinical cases, clinical pearls, and drug information questions from their APPEs in a formalized manner that instills professionalism through collegial interactions, re-engages with campus community, and cultivates a spirit of community. Department consent required.
Grading Basis: Letter Grade
Typically Offered: Fall.
