Public Health.

Across Colorado you’ll find our research teams in schools working hand in hand with teachers to improve the health of local youth; our students learning firsthand about disaster response and emergency preparedness, worker safety, and more; and our staff at local nonprofits working to advance our mission of health in the classroom and community.

Our mission

To promote the physical, mental, social, and environmental health of people and communities in the Rocky Mountain Region, across our nation, and globally. The mission will be accomplished through collaborations in education, population-based research, and community service that bring together institutions, agencies, and diverse populations.

Our vision

The Colorado School of Public Health will become one of the nation’s premier institutions for public health education and research, with top recognition for its work in selected areas and an outstanding reputation for delivering education, training, and service programs that are based in science, proven in practice, and adapted through creativity to meet pressing population health needs.

Our commitment to diversity and health equity

Our Inclusion, Diversity, and Health Equity mission is to build a diverse and representative academic community which recognizes the importance of social and economic justice in relation to health. ColoradoSPH is committed to working to build an inclusive, culturally competent institution which includes the environment, policies and procedures, faculty, staff, leadership, and student body.
