

IMMUNOLOGY (PHD)

The doctoral program in Immunology at the University of Colorado Anschutz Medical Campus trains students in diverse areas of immunology that includes innate and adaptive immunity, host-pathogen interactions, tumor immunity, autoimmunity, immune deficiencies, and vaccine development.

The Immunology Graduate Program at the University of Colorado Anschutz Medical Campus is amongst the most prominent basic Immunology graduate research training Programs in the country. Since its founding in 1989, our Program has conferred over 150 PhD degrees to students from a variety of ethnic and cultural backgrounds. Our curriculum combines formal coursework with mentoring by an engaged faculty in a collaborative environment. The Program draws from the academic strengths of three institutions that contribute significant resources and house our training faculty and students – The CU Denver | Anschutz, National Jewish Health, and the Barbara Davis Center for Childhood Diabetes.
