Students in the Biomedical PhD programs receive the education and support to conduct innovative biomedical research. The PhD programs provide training in a wide variety of essential skills, including oral and written communication, leadership, and personal and professional integrity. The diverse, inclusive, and safe environment, fostered by the School of Medicine and Anschutz Medical Campus, supports the holistic training provided by our programs that prepares one for a wide range of career opportunities.

Mission Statement
The 13 Biomedical PhD programs of The Office of Research Education in the School of Medicine collaborates to achieve a tripartite mission:

- To train excellent and diverse PhD graduate students in the critical thinking, research design and methods required for impactful biomedical research.
- To provide an intellectual center that enriches and furthers the curiosity that draws students and faculty to scientific research, innovation, education and communication.
- To foster strong scientific interactions between the basic science and clinical/translation research communities on our campus and across the nation to advance fundamental discoveries and improve health.
