BIOENGINEERING (BIOE)

BIOE 5010 - Cell and Molecular Biology for Bioengineers (3 Credits)
Introduction to cellular and molecular biology, with a focus on using engineering methods and literature to analyze structure and function of cells throughout lifecycle and multiple scales. Design experiments to test hypotheses. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5011 - Systems Physiology for Bioengineers (3 Credits)
Use engineering principles to study key physiological systems. Topics: cardiovascular, neuroscience, urological, or renal medicine. Related engineering principles: pressure-flow relationships, stress-strain, electromechanical coupling and signal transduction. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5020 - Analytics and Machine Learning in Bioengineering (3 Credits)
This course provides mathematical tools essential for graduate level bioengineering work. Studies selected topics from probability, linear algebra, and vector calculus, with emphasis on bioengineering applications. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5021 - Numerical Methods for Engineering Analysis (3 Credits)
Provides computational skills and knowledge of numerical methods for engineering/scientific computation using Matlab. Topics: root finding, interpolation, difference and integration rules, solution of initial and boundary value ODEs, and introduction to the solution of PDEs. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5039 - Mechatronics and Embedded Systems (3 Credits)
The course focuses on the design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics (Ohm’s law, RLC circuits, DC and AC signals, diode and transistor circuits, operational amplifiers, and digital signals), introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems, and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic and embedded systems design. Students must design and build an embedded systems device related to assistive technology. Note: Project expenses may be incurred ($50 maximum). Cross-listed with BIOE 4039. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5040 - Research Methods for Bioengineers (2 Credits)
This course introduces research methods that will prepare bioengineering graduate students for completing basic or translational research and communicating the results. Topics include setting expectations with mentors, finding, reading, analyzing, citing, and reviewing scientific literature, technical writing, research presentations, and responsible conduct of research. Restriction: Restricted to Students must be enrolled in the CU BIOE BS/MS program OR be within the first two years of CU BIOE MS/PhD study and have identified a research advisor. Students enrolled in other departments may be admitted with instructor approval. Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: the BIOE BS/MS program OR BIOE MS/PhD study.
Typically Offered: Spring.

Typically Offered: Fall, Spring.

Typically Offered: Fall, Spring.

Typically Offered: Fall, Spring.

Typically Offered: Fall, Spring.

Typically Offered: Fall, Spring.
BIOE 5064 - Advanced MatLab For Bioengineers And Life Scientists (3 Credits)
MatLab programming for graduate bioengineers and life scientists. Topics include MatLab syntax and optimization as well as techniques for working with scalars, time-series, images and multi-dimension datasets. Surface/Curve fitting, modeling, automation and classification will be covered. Cross-listed with BIOE 4064. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5067 - Human Factors and Usability Testing for Bioengineers (3 Credits)
This course provides an introduction to human factors testing and evaluation in the context of medical devices and assistive technology (AT). Particular focus will be given towards designing and applying usability testing to inform product design decisions or improvements. Topics include human factor considerations for aging and disabled populations (and their care providers), usability techniques, user experience data collection and interpretation, etc. Students will engage in hands-on human factors assessments such as contextual inquiry of surgery patients, cognitive walkthroughs with simulating disability, and product usability testing and iteration. Max hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5068 - Introduction to Medical Imaging (3 Credits)
This course will introduce graduate students to the basic physics, technologies, and clinical methodologies underlying Ultrasound, MRI, CT, PET and SPECT imaging systems. The course will include lectures, and visits to campus hospital and research imaging systems as well as hands on ultrasound labs. Cross-listed with BIOE 4068. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5069 - Advanced Biomechanics for Graduates (3 Credits)
This course covers advanced topics such as blood flow dynamics, introduction to non-linear finite deformation techniques, blood rheology, and computational techniques. Cross-listed with BIOE 4069. Max hours: 3 credits.
Grading Basis: Letter Grade

BIOE 5073 - Neural Interfaces and Bionic Limbs (3 Credits)
This course will introduce graduate students to topics in neural interfaces (Brain machine interfaces, peripheral nerve interfaces etc.), the issues involved in the design of mechatronic limb systems and the decoding algorithms used to map the neural interface to the mechatronic limb. Cross-listed with BIOE 4073. Restrictions: Matriculated CEDC students. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

BIOE 5074 - Introduction to Laboratory Animal Research (3 Credits)
This course provides basic theoretical and practical knowledge on the use of the most common laboratory animal species, animal models and welfare, general concepts on animal biology and husbandry, and essential principles of anesthesia, analgesia, surgery and peri operative care. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5083 - Polymers in Biomedical Applications (3 Credits)
This course will introduce graduate students to fundamental synthetic method and basic characteristics of various polymeric biomaterials and their crucial roles in different biomedical applications. It will also cover how the polymers can be modified to enhance biomedical applications. Cross-listed with BIOE 4083. Prereq: Graduate standing at CU Denver or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5098 - Advanced MatLab Programming For Bioengineers And Life Scientists (3 Credits)
This course provides an introduction to advanced MatLab programming techniques and application for bioengineers and life scientists. Topics include advanced MatLab syntax and optimization as well as techniques for working with scalars, time-series, images and multi-dimension datasets. Surface/Curve fitting, modeling, automation and classification will be covered. Cross-listed with BIOE 4098. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5100 - Image Processing for BIOEs (3 Credits)
This course provides an overview of basic and advanced image processing algorithms from both a theoretical and a practical perspective with special emphasis in Bioengineering. Topics to be covered include quantization, filtering, texture analysis, Fourier transform, wavelets, morphological operations, image registration, segmentation, machine learning, deep learning, and principal component analysis (PCA). Cross-listed with BIOE 4100. Max hours: 3 credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

BIOE 5200 - Stem Cell and Regenerative Medicine (3 Credits)
This Bioengineering course is designed to familiarize students with the application of stem cells in regenerative medicine and in tissue engineering, including the integration of stem cells into damaged tissues. The course will cover the current state of tissue/organ engineering in the research and clinical settings. Some prior knowledge of cell biology is required to understand the content presented and discuss relevant literature. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

BIOE 5300 - Medical Device Design and Entrepreneurship (3 Credits)
This course will introduce the important processes needed to implement a medical device into a viable entrepreneurial venture with strong focus on the themes of disruption and innovation, investment readiness of a product idea (traction), business and risk analysis, and funding your ideas. At the same time, we will explore your entrepreneurial personality through the three lenses of personal motivation, work passion, and superpowers. Max hours: 3 credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

BIOE 5420 - Special Topics in Bioengineering (1-6 Credits)
Special topics of particular interest to graduate students in Bioengineering. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

BIOE 5500 - Bioengineering and Diabetes (1 Credit)
This course will introduce and reinforce fundamental concepts in metabolism and diabetes pathogenesis and introduce key bioengineering principles in developing diagnostics, treatments and cures for diabetes. Restriction: Restricted to Bioengineering students with graduate student status. Term offered: Spring.
Grading Basis: Letter Grade
Restriction: Restricted to Bioengineering students with graduate student status.
Typically Offered: Spring.

BIOE 5840 - Independent Study in Bioengineering (1-6 Credits)
Graduate level independent study in Bioengineering with a faculty mentor. Prereq: Graduate standing within the Department of Bioengineering or permission of instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

BIOE 5939 - Graduate Internship (1-6 Credits)
Department of Bioengineering Internship. Credit may not be applied toward the MS in Bioengineering degree. Enrollment by department permission only. Max Hours: 6 Credits.
Grading Basis: Letter Grade
BIOE 6655 - Foundations of Doctoring MS Years (1-5 Credits)
This course is for CU MD-MS students who are on leave of absense from SOM and wish to maintain clinical exposure and training during the leave. Prereq: Phase I & II SOM classes. Repeatable. Max Hours: 20
Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 20.

BIOE 6950 - Masters Thesis (1-6 Credits)
Research for Master Thesis under supervision of faculty thesis advisor.
Prerequisites: Consent of thesis advisor. Restrictions: Satisfactory progress toward MS-Bioengineering degree. Repeatable. Max hours: 6
Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

BIOE 6960 - Master's Project (1-6 Credits)
Training for Master's Project under the supervision of faculty project advisor. Prereq: Department Consent. Repeatable. Max hours: 6
Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.

BIOE 8990 - Doctoral Dissertation (1-10 Credits)
Research for doctoral dissertation under supervision of faculty advisor.
Prerequisites: Consent of dissertation advisor. Restrictions: Satisfactory progress toward PhD-Bioengineering Degree. Repeatable. Max hours: 10
Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
