PHILOSOPHY (PHIL)

PHIL 5002 - Ancient Greek Philosophy (3 Credits)
What is philosophy? What is the nature of reality? What is the difference between knowledge and opinion? What is the best kind of life for a human being to lead? Ancient Greece was the birthplace of Western philosophy, and this course traces the history of ancient Greek thought, from Homer and Hesiod through the pre-Socratic thinkers (e.g. such figures as Thales, Pythagoras, Heraclitus, Parmenides, Zeno of Elea, Empedocles, Anaxagoras and Democritus) to Plato, Aristotle and later Hellenistic thought. PHIL 5022 - Knowledge, Perception, and the Search for Objectivity: Modern Philosophy (3 Credits)
How does physical matter relate to minds and the mental realm? How does objective reality relate to what seems subjective — human knowledge, perception, and feeling, etc.? What is the role of logical thinking in connecting the objective and subjective areas of reality? Can philosophy ground knowledge so that scientific inquiry is safe from skepticism? These are just a few of the problems posed by the “modern” period in philosophy, from roughly the end of the 16th century to the end of the 18th century. This course examines such epistemological questions and surveys key metaphysical themes that modern thinkers inherited from ancient and medieval philosophy. Figures typically include Descartes, Leibniz, Spinoza, Locke, Hume, and Kant, among others. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 3022. Term offered: spring. PHIL 5050 - Propaganda: Truth, Lies, and Freedom (3 Credits)
All who live in this world must choose what to do. Some of those choices can rely on first-hand experience, but most rely on information, facts, and descriptions from external sources. As every programmer will tell you, "Garbage in, garbage out." Thus, getting "good" information is critical to our ability to live freely, autonomously, and ethically. It is typical for philosophy classes to teach logic and reasoning — and those are important. But reasoning is useless if its content (or information) is deceptive, misleading, or incoherent. What's more, since democratic countries are premised upon knowledgeable citizens, the short-circuiting of reasoning by propaganda may be the greatest danger democracy has. The question becomes: what is propaganda? How do we define it? How do we locate it? And finally, how do we spell out what's (possibly) wrong with it? Accordingly, this course is an inquiry into the epistemic, technological, and ethical dimensions of propaganda. It will define propaganda, identify how it works, and seek to understand the variety of agents and motives who use propaganda to achieve their ends. (It is not assumed that propaganda is always good or always bad, by the way.) In addition to understanding the logical and epistemological nature of propaganda, this course will examine how it is disseminated. How do technologies (text, video, social media, algorithms, etc.) influence and foment misinformation? The overarching goal will be to become more aware and critical of propaganda we encounter so we can avoid "garbage" information which can manipulate us and prevent us from reasoning logically and ethically. Cross-listed with PHIL 3050. Max hours: 3 Credits.
