

GRADUATE CATALOG

Graduate Programs

CU Denver offers many options for students who want to continue their education after earning a bachelor's degree. From traditional master's and doctoral programs to graduate certificates and accelerated master's programs, our graduate studies help students continue their education, conduct further research, and improve career skills. Our graduate students work collaboratively with faculty who are consistently recognized for research that shapes our community, the nation, and the world.

CU Denver schools and colleges have developed master's, doctoral, and graduate certificate degrees for students studying on campus and online. Graduate students can choose from more than 50 master's programs. We also offer doctoral degrees in 14 different programs. Additionally, we collaborate with CU Anschutz Medical Campus on combined programs in diverse health care fields, including health ethics and bioengineering.
