Introduction

The MS Management program prepares students for significant managerial responsibilities in the private and public sectors. Core course requirements provide students with an advanced understanding of how to manage interpersonal dynamics, effectively design organizations, implement planned change and organizational transformations, and develop human resources. Students build on this foundation with any four electives in MGMT, or with the courses that comprise one of the career-focused specializations.

The specializations include: business strategy and innovation, leadership and change management, managing for sustainability, and a self-directed option.
