RECORDING ARTS IN EDUCATION CERTIFICATE

Please click here (http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-arts-media/music-entertainment-industry-studies/) to see general Music & Entertainment Industry Studies information.

Introduction

Recording Arts is a field that deals with all aspects of recorded music, sound art and audio engineering including mixing, mastering, production, sound design, generative music, surround sound, sequencing, calibration, live sound reinforcement, networked audio, and post-production. CU Denver Recording Art students refine skills in sound recording, aesthetics, digital signal processing, automated mixing, synchronization, stereo imaging and monitoring, mastering, post-production, and multimedia production.
