Applied Geography & Geospatial Science, MA

Graduate School Policies and Procedures (http://catalog.ucdenver.edu/cu-denver/graduate/graduate-school-policies-procedures/) apply to this program.

Please click here to see Geography and Environmental Sciences department information.

**Program Director:** Rafael Moreno  
**Office:** North Classroom  
**Fax:** 303-315-7556  
**E-mail:** Rafael.Moreno@ucdenver.edu  
**Web site:** MS in Environmental Sciences

**Introduction**

In the United States and around the world, balancing the preservation of the natural environment with the imperatives of economic development along with concerns for social well-being has led to a growing demand for broadly trained individuals who can identify and understand pressing social and environmental issues, collect and analyze relevant data, and develop and implement innovative solutions. Graduates of the M.A program in Applied Geography and Geospatial Science will have the knowledge, training, and tools to become leaders in this rapidly growing field.

The program’s research focus is human-environment interaction, a longstanding hallmark of the discipline of Geography. Within this area of critical geographic inquiry, the program emphasizes geospatial science, a federally recognized STEM subject area that includes geographic information systems (GIS) as well as computer cartography, remotely sensed image analysis, and spatial statistics. Students apply their geospatial research skills in the context of hands-on, faculty-led research projects that stress professional development through community engagement and interactive service learning.

**Financial Aid**

There are three types of financial aid available: teaching assistant student hourly positions; research assistantship positions funded by grants to specific program faculty; and the regular package of financial aid (primarily loans) available through the financial aid office on the Denver campus. Incoming students will be automatically considered for program-distributed assistance at the time of admission to the program. Continuing students will be regularly appraised of available aid and positions. All other aid should be requested through the

CU Denver Financial Aid Office  
Student Commons Building, 5th floor  
Campus Box 125  
P.O. Box 173364  
Denver, CO 80217-3364  
Telephone: 303-315-1850

**Internships**

Students in the Applied Geography & Geospatial Science MA program are strongly encouraged to contact the Experiential Learning Center for internships and paid positions related to geographical sciences. The Experiential Learning Center is located in the Tivoli Student Union, Suite 260. Telephone: 303-556-2250. Many students have had internships in federal agencies, such as the U.S. Environmental Protection Agency and the U.S. Geological Survey.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor to confirm the best plans of study before finalizing them.

**Program Requirements**

The program is offered by the faculty of the Department of Geography and Environmental Sciences in the College of Liberal Arts and Sciences. Students undertake 36 credit hours over a two-year period. These 36 hours include required core classes, a required service learning studio, required geo-spatial science methods coursework and electives. Students can elect to undertake either of two tracks: the first "coursework" track involves additional elective courses, whereas the second "thesis" track involves required courses, including preparation of a written thesis.

1. Students must complete a minimum of 36 credit hours from approved courses.
2. Students must complete a minimum of 36 graduate (5000-level) or higher credit hours from approved courses.
3. Students must earn a minimum grade of B (3.0) or better in all core courses, a B- (2.7) in all other courses applied to the degree and must achieve a minimum cumulative program GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Courses taken using pass/fail grading cannot apply to degree requirements.
4. Students must complete all coursework with CU Denver faculty.

**Program Restrictions, Allowances and Recommendations**

1. Many of the electives have prerequisites; students must have met these requirements in order to take the course.
2. Courses applied to either a certificate* or an MA degree may later be applied toward the other if all pertinent coursework is completed within a five year time period.
3. Students should fill out and submit all relevant department forms for their files. Importantly, all petitions for course substitutions and identification of where courses fit as electives, with the subsequent approval/denial, should be submitted to this file.
4. By the end of the first semester, each student should identify and declare whether or not s/he is pursuing the thesis or non-thesis option. If intending to pursue the thesis option, the student should identify and gain agreement from a content advisor for guiding the thesis, filling out and submitting the appropriate departmental form.
5. Many of the electives have pre-requisites; students must have met these requirements in order to take the course.
6. Students may transfer up to nine hours of approved graduate-level credit into the program. These courses must be approved by the Graduate Director and they may not replace core courses.
7. Students may count up to six credit hours of independent, with a maximum of 3-credit hours per independent study towards elective credit in the major as approved by the Graduate Director. No more than 3 credit hours of independent study may be taken with the same instructor and they may not be taken in the same term.
8. Students may count up to six credit hours of internship in total, but 3-credit hours per internship and per entity (sponsorship may be with same professor sponsor)

9. Students may not count 4000-level courses towards electives in the program; this may be petitioned to the Graduate Committee in exceptional cases.

10. Students may take a maximum of two online courses, or petition to the GES Graduate Committee beyond two.

11. Students may enroll in thesis preparation and writing hours only after submission of signed committee form, which requires approval of the thesis proposal.

12. Students electing to follow the MA Thesis Track can allocate 3 to 6 credits toward their thesis work. If they choose to allocate six credits toward the thesis work, three of those credits can replace a three credits elective course requirement.

13. Students will not receive a grade for thesis preparation and writing hours until the thesis is successfully defended.

14. Students must follow the graduate school deadlines for submission of paperwork for the graduation application, comprehensive exam, and any other deadlines. Links to these can be found on the GES/MS website.

15. Work submitted for the environmental sciences options must have a grade of B (3.0) or better.

16. GES offers Geospatial, Environmental Education, and Urban Agriculture independent graduate certificates. These certificates may be earned without entrance into the MS in environmental sciences program. (See the Geographic Information Science Graduate Certificate (http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/geography-environmental-sciences/geographic-information-science-graduate-certificate/), Sustainable Urban Agriculture Graduate Certificate (http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/geography-environmental-sciences/sustainable-urban-agriculture-graduate-certificate/), and Environmental Science Education Graduate Certificate (http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/geography-environmental-sciences/environmental-science-education-graduate-certificate/ descriptions.)

Complete the following program requirements: 36

Complete the following required courses: 10

GEOG 5050  Applied Spatial Statistics
GEOG 6300  Foundations Seminar in Human-Environmental Interaction
GEOG 6800  Community-Based Research Practicum

Complete 12 credit hours of Geospatial Science and Methods Courses: 12

CSCI 5559  Database Systems
CVEN 5382  Geospatial Data Development
CVEN 5383  GIS Analysis – Theory and Practice
CVEN 5385  GIS Relational Database Systems
ENVS 6200  Risk Assessment
ENVS 6220  Toxicology
ENVS 6230  Environmental Epidemiology
GEOG 5060  Remote Sensing I: Introduction to Environmental Remote Sensing
GEOG 5070  Remote Sensing II: Advanced Remote Sensing
GEOG 5081  Cartography and Computer Mapping
GEOG 5085  GIS Applications for the Urban Environment
GEOG 5090  Environmental Modeling with Geographic Information Systems
GEOG 5091  Open Source Software for Geospatial Applications
GEOG 5092  GIS Programming and Automation
GEOG 5095  Deploying GIS Functionality on the Web
GEOG 5235  GIS Applications in the Health Sciences

Complete eight-nine credit hours of elective courses, with a minimum of one course from the approved Human Geography course list and one course from the approved Physical Geography course list: 8-9

Human Geography (p. 2)
Physical Geography (p. 2)

Complete the Thesis or Non-Thesis option to complete the degree: 6

Thesis Option (p. 3)
Non-Thesis Option (p. 3)

Students must follow the graduate school deadlines for submission of paperwork for the graduation application, comprehensive exam, and any other deadlines. Links to these can be found on the GES/MS website.

Complete the following program requirements: 36

Complete the following required courses: 10

GEOG 5050  Applied Spatial Statistics
GEOG 6300  Foundations Seminar in Human-Environmental Interaction
GEOG 6800  Community-Based Research Practicum

Complete 12 credit hours of Geospatial Science and Methods Courses: 12

CSCI 5559  Database Systems
CVEN 5382  Geospatial Data Development
