Web site: MS in Environmental Sciences

Introduction
In the United States and around the world, balancing the preservation of the natural environment with the imperatives of economic development along with concerns for social well-being has led to a growing demand for broadly trained individuals who can identify and understand pressing social and environmental issues, collect and analyze relevant data, and develop and implement innovative solutions. Graduates of the M.A. program in Applied Geography and Geospatial Science will have the knowledge, training, and tools to become leaders in this rapidly growing field.

The program’s research focus is human-environment interaction, a longstanding hallmark of the discipline of Geography. Within this area of critical geographic inquiry, the program emphasizes geospatial science, a federally recognized STEM subject area that includes geographic information systems (GIS) as well as computer cartography, remotely sensed image analysis, and spatial statistics. Students apply their geospatial research skills in the context of hands-on, faculty-led research projects that stress professional development through community engagement and interactive service learning.

Financial Aid

There are three types of financial aid available: teaching assistant student hourly positions; research assistantship positions funded by grants to specific program faculty; and the regular package of financial aid (primarily loans) available through the financial aid office on the Denver campus. Incoming students will be automatically considered for program-distributed assistance at the time of admission to the program. Continuing students will be regularly apprised of available aid and positions. All other aid should be requested through the

CU Denver Financial Aid Office  
Student Commons Building, 5th floor  
Campus Box 125  
P.O. Box 173364  
Denver, CO 80217-3364  
Telephone: 303-315-1850

Internships

Students in the Applied Geography & Geospatial Science MA program are strongly encouraged to contact the Experiential Learning Center for internships and paid positions related to geographical sciences. The Experiential Learning Center is located in the Tivoli Student Union, Suite 260. Telephone: 303-556-2250. Many students have had internships in federal agencies, such as the U.S. Environmental Protection Agency and the U.S. Geological Survey. These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements
The program is offered by the faculty of the Department of Geography and Environmental Sciences in the College of Liberal Arts and Sciences. Students undertake 36 credit hours over a two-year period. These 36 hours include required core classes, a required service learning studio, required geo-spatial science methods coursework and electives. Students can elect to undertake either of two tracks: the first “coursework” track involves additional elective courses, whereas the second “thesis” track involves required courses, including preparation of a written thesis.

1. Students must complete a minimum of 36 credit hours from approved courses.
2. Students must complete a minimum of 36 graduate (5000-level) or higher credit hours from approved courses.
3. Students must earn a minimum grade of B (3.0) or better in all core courses, a B- (2.7) in all other courses applied to the degree and must achieve a minimum cumulative program GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Courses taken using P+/P/F or S/U grading cannot apply to degree requirements.
4. Students must complete all coursework with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Many of the electives have prerequisites; students must have met these requirements in order to take the course.
2. Courses applied to either a certificate* or an MA degree may later be applied toward the other if all pertinent coursework is completed within a five year time period.
3. Students should fill out and submit all relevant department forms for their files. Importantly, all petitions for course substitutions and identification of where courses fit as electives, with the subsequent approval/denial, should be submitted to this file.
4. By the end of the first semester, each student should identify and declare whether or not s/he is pursuing the thesis or non-thesis option. If intending to pursue the thesis option, the student should identify and gain agreement from a content advisor for guiding the thesis, filling out and submitting the appropriate departmental form.
5. Many of the electives have pre-requisites; students must have met these requirements in order to take the course.
6. Students may transfer up to nine hours of approved graduate-level credit into the program. These courses must be approved by the Graduate Director and they may not replace core courses.
7. Students must count up to six credit hours of independent, with a maximum of 3-credit hours per independent study towards elective credit in the major as approved by the Graduate Director. No more than 3 credit hours of independent study may be taken with the same instructor and they may not be taken in the same term.
8. Students must count up to six credit hours of internship in total, but 3-credit hours per internship and per entity (sponsorship may be with same professor sponsor)
1. Students must follow the graduate admissions deadlines.

2. Complete 12 credit hours of Geospatial Science and Methods Courses:
   - GEOG 5085
   - GEOG 5081
   - GEOG 5070
   - GEOG 5060
   - ENVS 6230
   - ENVS 6220
   - ENVS 6200
   - CVEN 5383
   - CVEN 5382
   - CSCI 5559
   - GEOG 6800
   - GEOG 5050
   - GEOG 5020
   - GEOG 5040
   - GEOG 5030
   - GEOG 5020
   - GEOG 5010
   - GEOG 5000
   - GEOG 5090
   - GEOG 5091
   - GEOG 5092
   - GEOG 5095
   - GEOG 5235

3. Complete the following required courses:
   - GEOG 5050: Applied Spatial Statistics
   - GEOG 6300: Foundations Seminar in Human-Environmental Interaction
   - GEOG 6800: Community-Based Research Practicum

4. Complete 12 credit hours of Geospatial Science and Methods Courses:
   - CSCI 5559: Database Systems
   - CVEN 5382: Geospatial Data Development
   - CVEN 5383: GIS Analysis – Theory and Practice
   - CVEN 5385: GIS Relational Database Systems
   - ENVS 6200: Risk Assessment
   - ENVS 6220: Toxicology
   - ENVS 6230: Environmental Epidemiology
   - GEOG 5060: Remote Sensing I: Introduction to Environmental Remote Sensing
   - GEOG 5070: Remote Sensing II: Advanced Remote Sensing
   - GEOG 5081: Cartography
   - GEOG 5085: GIS Applications for the Urban Environment

5. Complete a minimum of eight credit hours of elective courses, with a minimum of one course from the approved Human Geography course list and one course from the approved Physical Geography course list.  
   - Human Geography (p. 2)
   - Physical Geography (p. 2)

6. Complete the Thesis or Non-Thesis option to complete the degree:
   - Thesis Option (p. 3)
   - Non-Thesis Option (p. 3)

7. Total Hours: 36

8. Students may take up to six credit hours outside the Department of Geography & Environmental Sciences, with advisor approval.
