

CHEMISTRY, BS - ACS CERTIFIED

Introduction

Please click here (<http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/chemistry/>) to see Chemistry Department information.

The Chemistry Department offers two options for a chemistry degree: a BS Chemistry or a BS Chemistry ACS Certified. Students interested in the chemistry major should consult regularly with the chemistry major advisor, Dr. Marta K. Maron (marta.maron@ucdenver.edu). The Advisor can help you select the track that best fits your future goals. A complete description of the chemistry major programs may be obtained in the Department of Chemistry office (Science 3071) or Department website.

Qualified majors are strongly urged to participate in directed research with a research faculty member and in the departmental honors program. We also strongly encourage chemistry majors to participate in the Department by serving as graders, learning assistants, and/or teaching assistants. Contact the chemistry major advisor for more information and/or questions.

Students planning chemistry as a career should be familiar with the recommendations of the American Chemical Society (ACS) for the professional training of chemists. The ACS certification requires students following the BS program of study take foundation courses in the five sub-disciplines of chemistry: analytical chemistry, biochemistry, inorganic chemistry, organic chemistry and physical chemistry. In addition, students take an in-depth (second semester) course in four out of the five sub-disciplines and are required to complete 400 hours of laboratory work post General Chemistry Laboratories. Laboratory work has to encompass four of the five sub-disciplines. General Chemistry I and II with laboratories are considered introductory courses and are prerequisites to foundation courses. No chemistry course with a grade of less than C (2.0) can be applied toward ACS certification. Students should check with the undergraduate chemistry major Advisor for details.

These Degree requirements are subject to periodic revision by the Academic Department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

This is an on-campus program.

Declaring This Major

- Click here (<http://catalog.ucdenver.edu/cu-denver/undergraduate/records-registration/registration/declare-change-major-minor/>) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (<http://catalog.ucdenver.edu/cu-denver/undergraduate/graduation/general-graduation-requirements/>)
- CU Denver Core Curriculum (<http://catalog.ucdenver.edu/cu-denver/undergraduate/graduation-undergraduate-core-requirements/>)
- College of Liberal Arts & Sciences Graduation Requirements (<http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/#graduationrequirements>)
- Click here (<http://catalog.ucdenver.edu/cu-denver/undergraduate/academic-policies-procedures/>) for information about Academic Policies

Program Requirements

- Students must complete a total of 72 credit hours, including a minimum of 51 CHEM credit hours and 18 credit hours in ancillary coursework.
- Students must complete a minimum of 16 upper division level (3000-level and above) CHEM credit hours.
- Students must earn a minimum grade of C (2.0) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
- Students must complete a minimum of 14 CHEM credit hours with CU Denver faculty, including CHEM 4128 Instrumental Analysis Laboratory, CHEM 4518 Physical Chemistry Laboratory: Reaction Analysis or CHEM 4538 Physical Chemistry Laboratory: Molecular Structure.

Program Restrictions, Allowances and Recommendations

- A student who has declared a chemistry major at CU Denver may not take additional chemistry courses outside of the department for the purpose of applying those credits toward meeting the requirements of the major without prior written approval of the undergraduate advisor. No more than 3 additional hours of such pre-approved transfer credits will be allowed.
- All courses applied to the chemistry major need to be taken within ten years of the graduation date with the exception of General Chemistry I and II Lecture and Laboratory (CHEM 2031/2038 and CHEM 2061/2068). In the event that the student would like to apply for expired credit for Organic I Lecture (CHEM 3481), the student will need to test at the 50th percentile on the ACS Standardized Exam for Organic Chemistry I.
- PHYS 2321 Intro Experimental Phys Lab I and PHYS 2341 Intro Experimental Phys Lab II are specifically designed for students in non-Physics majors and can be paired with either PHYS 2010 College Physics I and PHYS 2020 College Physics II or PHYS 2311 General Physics I: Calculus-Based and PHYS 2331 General Physics II: Calculus-Based lectures. Students pursuing a second major in Physics should complete PHYS 2311 General Physics I: Calculus-Based and PHYS 2331 General Physics II: Calculus-Based and PHYS 2351 Applied Physics Lab I and PHYS 2361 Applied Physics Lab II.
- Students may double major in Biochemistry and Chemistry. Students can apply the requirements for both majors, if the respective courses are a major requirement for both the Chemistry and Biochemistry major. Students must select unique Chemistry or Biochemistry

elective courses to satisfy elective course credit requirements for both majors. A course cannot fulfill more than two requirement/elective areas in a student's degree.

Required Courses

Code	Title	Hours
<i>Take all of the following</i>		51
CHEM 2031 or CHEM 2081	General Chemistry I Honors General Chemistry I	3
CHEM 2038 or CHEM 2088	General Chemistry Laboratory I Honors General Chemistry I Laboratory	1
CHEM 2061 or CHEM 2091	General Chemistry II Honors General Chemistry II Lecture	3
CHEM 2068 or CHEM 2098	General Chemistry Laboratory II Honors General Chemistry II Laboratory	2
CHEM 3011	Inorganic Chemistry	3
CHEM 3111	Analytical Chemistry	3
CHEM 3118	Analytical Chemistry Laboratory	2
CHEM 3481	Majors Organic Chemistry I	4
CHEM 3488	Majors Organic Chemistry Laboratory I	1
CHEM 3491	Majors Organic Chemistry II	4
CHEM 3498	Majors Organic Chemistry Laboratory II	2
CHEM 4121	Instrumental Analysis	3
CHEM 4128	Instrumental Analysis Laboratory	2
CHEM 4500	Foundations of Physical Chemistry ¹	3
CHEM 4511	Physical Chemistry: Thermodynamics and Kinetics	3
CHEM 4518	Physical Chemistry Laboratory: Reaction Analysis	2
CHEM 4521	Physical Chemistry: Quantum and Spectroscopy	3
CHEM 4538	Physical Chemistry Laboratory: Molecular Structure	2
CHEM 4810 or CHEM 3810	General Biochemistry I Biochemistry	3
CHEM 4828 or CHEM 3018	Biochemistry Lab ² Inorganic Chemistry Laboratory	2

¹ Students who choose Physics **Sequence A** can substitute MATH 2421 Calculus III or MATH 3511 Mathematics of Chemistry for CHEM 4500 Foundations of Physical Chemistry.

² CHEM 4828 Biochemistry Lab requires additional prerequisites other than the courses listed above.

Upper Division Lecture Elective

Code	Title	Hours
<i>Select one of the following:</i>		3
CHEM 4221	Practical Applications of Spectroscopy	3
CHEM 4310	Advanced Organic Chemistry	3
CHEM 4421	Cannabis Chemistry	3
CHEM 4510	Computational Chemistry	3
CHEM 4700	Environmental Chemistry	3
CHEM 4820	General Biochemistry II	3
CHEM 4835	Biochemistry of Gene Regulation and Cancer	3
CHEM 4845	Molecular Modeling and Drug Design	3

CHEM 4860	Bioinorganic Chemistry: Bioinorganic compounds in medicine	3
CHEM 5010	Advanced Inorganic Chemistry	3
CHEM 5550	Applications of Group Theory in Chemistry	3
CHEM 4600	Advanced Topics in Chemistry ³	1-3

³ With permission from course instructor and undergraduate major advisor. The course must fulfill either the biochemistry or inorganic chemistry area.

Ancillary Course Requirements

Code	Title	Hours
<i>Take all of the following:</i>		18

Math

Code	Title	Hours
Take all of the following:		
MATH 1401	Calculus I	4
MATH 2411	Calculus II	4

Physics

Code	Title	Hours
<i>Select one of the following sequences:</i> ⁴		
Sequence A ⁵		
PHYS 2311	General Physics I: Calculus-Based	4
PHYS 2321	Intro Experimental Phys Lab I	1
PHYS 2331	General Physics II: Calculus-Based	4
PHYS 2341	Intro Experimental Phys Lab II	1
Sequence B		
PHYS 2010	College Physics I	4
PHYS 2321	Intro Experimental Phys Lab I	1
PHYS 2020	College Physics II	4
PHYS 2341	Intro Experimental Phys Lab II	1

⁴ Referring to note 3 under Program Restrictions, Allowances and Recommendations for alternative Physics lab information

⁵ Students who choose Physics **Sequence A** can substitute MATH 2421 Calculus III or MATH 3511 Mathematics of Chemistry in place of CHEM 4500 Foundations of Physical Chemistry.
