Overview

Integrative Biology is the study of living organisms at different levels of organization, from molecular biology to biosphere ecology. Our undergraduate curriculum is designed to offer a firm foundation for understanding life processes, and a variety of biology electives to accommodate individual interests. Our courses prepare students to enter a wide variety of biological careers including health care, ecology, and bioengineering. Our graduates have the tools needed to think critically and to make informed decisions as citizens sharing the responsibility to take care of society and of Earth.

A single course may fulfill up to two requirements in the following areas: CU Denver Core Curriculum, CLAS Graduation requirements, a major program, a minor program, or a certificate program.

Departmental Honors

Departmental honors is only eligible for students who take classes for letter grades, with associated GPA values. Departmental honors is awarded to students based on their GPA in classes taken from Downtown Campus faculty. The following minimum GPA must be met both for all courses taken at CU Denver (overall GPA) and for biology courses alone (biology GPA) to receive the following honors levels: cum laude, 3.500; magna cum laude, 3.700; summa cum laude, 3.900.

Biology Research Scholars

The biology faculty encourages students to pursue research as part of their undergraduate education. Students who excel in both course work and research will be recognized as CU Denver Biology Research Scholars or Research Associates.

To qualify for the Research Scholars Program, you must:

• achieve a minimum grade point average of 3.500 in all courses taken from CU Denver faculty, as well as in all CU Denver biology courses
• participate in a research project, consisting of a minimum of six credit hours of independent study (BIOL 2840 Independent Study, BIOL 3840 Independent Study, or BIOL 4840 Independent Study), taken over at least two semesters
• write a scientific paper describing the research
• present an oral or poster presentation summarizing your research

To qualify for the Research Associates Program, you must:

• achieve a minimum grade point average of 2.500 in all courses taken from CU Denver faculty, as well as in all CU Denver biology courses
• participate in a research project, consisting of a minimum of three credit hours of independent study (BIOL 2840 Independent Study, BIOL 3840 Independent Study, BIOL 4840 Independent Study or BIOL 4880 Directed Research), taken over at least two semesters
• write a scientific paper describing the research or present an oral or poster presentation summarizing your research

Students who wish to become involved in research should contact Dr. Christopher Phiel no later than their junior year, and preferably sooner.
